

INSTALLATION INSTRUCTIONS

Clip on Damper kit for Split System AC & HP

IMPORTANT SAFETY INFORMATION

These instructions are primarily intended to assist qualified individuals experienced in the proper servicing of heating and air conditioning appliances. Some local codes require licensed installation/service personnel for this type equipment. Use of this kit must be in accordance with these instructions and with all applicable national and local codes and standards.

INSTALLER: Please read all instructions thoroughly before servicing this equipment. Pay attention to all safety warnings and any other special notes highlighted in the manual. Safety markings are used frequently throughout this manual to designate a degree or level of seriousness and should not be ignored. **WARNING** - Indicates a potentially hazardous situation that if not avoided, could result in personal injury or death.

WARNING:

ELECTRICAL SHOCK, FIRE OR EXPLOSION HAZARD

Failure to follow safety warnings exactly could result in serious injury or property damage.

Improper servicing could result in dangerous operation, serious injury, death or property damage.

- Before servicing, disconnect all electrical power to furnace.
- When servicing controls, label all wires prior to disconnecting. Reconnect wires correctly.
- Verify proper operation after servicing.

WARNING:

The safety information listed in this manual must be followed during the installation, service, and operation of this unit. Unqualified individuals should not attempt to interpret these instructions or install this equipment. Failure to follow safety recommendations could result in possible damage to the equipment, serious personal injury or death.

ABOUT THE CLIP ON DAMPER KIT

This clip on damper kit includes the following items:

Description

Quantity

Cip-On Dampers	8
Installation Instructions	1

The clip on dampers supplied with this kit are designed to dampen any vibration between the unit's fan grille and top pan. This prevents the fan grille from vibrating against the top pan and causing noise issues. These clip on dampers should only be needed if a unit is confirmed to have noise being generated by the fan grille vibrating against the top pan.

INSTALLATION SEQUENCE

1. **IMPORTANT!** Turn the power off to the unit.
2. Attach the clip on dampers to the grille in the locations shown in Figure 1. Push the open end of the clip on the damper down over the round metal rods of the fan grille. Make sure the flat paper covered end is pointing up.
3. Remove the 4 screws securing the fan grille to the top pan. Do not discard the screws.
4. Slightly lift the fan grille up with one hand and rotate the clip on damper with the other hand so that the flat paper covered end is pointing down. **NOTE:** This process may need to be repeated a couple of times in order to get all 8 of the clip on dampers rotated properly.
5. Lower the fan grille back into position.
6. Install the 4 screws removed earlier in Step 3.
7. Restore power to the unit and check unit operation.
