

## Hail Guard Kit

# INSTALLATION INSTRUCTIONS

1. Measure the height and length of the visible coil surface.
2. Trim Hail Guard to the appropriate height and length.
3. Line up edge of mesh with the edge of the sheet metal and attach to the Coil Guard with the cable ties provided.
4. Pull mesh around the unit and attach at opposite end with additional cable ties. Use additional cable ties as required along mesh length to hold it snug to the Coil Guard.
