BROAN® HIGH-EFFICIENCY

FIXED-SPEED PACKAGED, 2-5 TONS

13 SEER/80% AFUE GAS/ELECTRIC PACKAGED SYSTEMS

13 SEER/7.7 HSPF HEAT PUMPS

Leave it to Broan to make your life just a little more livable. Broan's series of gas/electric packaged systems work seamlessly and efficiently to increase your comfort at home. These units are designed to be quiet and energy efficient while providing comfort and dependability. For your peace of mind, each Broan gas/electric packaged system offers a 10-year limited warranty, one of the most comprehensive warranties available, registration required.

A gas/electric packaged system combines the convenient electric cooling of an air conditioner with the energy-efficient gas heat of a furnace, all in one space-saving outdoor unit. All Broan heat pumps and air conditioners are built using proven, reliable parts. Each part is examined carefully with our rigorous quality check process.

Your select Broan heating and cooling contractor can help you determine if a gas/electric packaged system is the best solution for your home comfort needs.

Broan's 13 SEER packaged heat pumps provide electric heating and cooling. During warmer months, it collects heat from the air in your home and moves it to the outside. In winter, the process reverses, and the heat pump collects heat from air outside to warm the air inside your home.

Supplemental heater kits can also be installed with Broan 13 SEER packaged air conditioners to heat the home. Your Broan contractor can recommend the appropriate packaged product for your home.

ENERGY EFFICIENCY

Broan packaged systems provide high efficiency, less energy consumption and lower utility bills. You can be sure in the total comfort of your home that Broan packaged products will save you more.

Annual costs based on 36,000 Btu units, 1,500 cooling load hours and .08/kwh. Actual costs may vary depending on climate conditions, energy rates and patterns of usage.

ADVANCED TECHNOLOGY

On gas/electric packaged systems, the SmartLite® Control Board learns the igniter's heat-up characteristics. It then adapts the ignition time to the packaged system's characteristics, resulting in extending the life of the igniter.

All Broan packaged systems include enhanced evaporator coils to better combat corrosion.

QUIET COMFORT

The high-efficiency condenser motor and fan blades provide quiet operation and low vibration.

Your packaged system is only one part of the comfort system that affects your air quality and energy savings. Broan offers a complete line of system components to improve indoor air quality and help ensure the performance of your comfort system.

DURABILITY AND STYLE

Broan models feature Silicone polyester, urethane-coated galvanized steel with a 950-hour salt spray finish, which protects the unit from corrosion 50% better than other coatings.

PEACE OF MIND

The Broan series of products offer a 10-year limited warranty on parts, when registered. Plus, our Quality Pledge states that your entire unit will be replaced if the compressor or heat exchanger fails within the first 10 years of purchase, registration required.

Ask your BROAN heating and cooling contractor or visit us at www.broanhvac.net for warranty details.

Product registration required.

ENERGY DEFINITIONS

SEER – Seasonal Energy Efficiency Ratio

Measures cooling performance on air conditioners, heat pumps and gas/electric packaged products.

HSPF – Heating Seasonal Performance Factor

It is a measure of the average number of Btu of heat delivered for every Watt-hour of electricity used by the heat pump over the heating season.

AFUE – Annual Fuel Utilization Efficiency

It measures the amount of heat actually delivered to your house compared to the amount of fuel that you must supply to the furnace. Thus, a furnace that has an 80% AFUE rating converts 80% of the fuel that you supply to heat – the other 20% is lost out of the chimney.

As ratings increase, so does unit efficiency.
