Mammoth®

THE COMPETITIVE EDGE

www.mammothlc.com

What is the Mammoth Competitive Edge?

The Mammoth Competitive Edge: iQ Drive® gas/electric packaged systems use an inverter-driven rotary compressor coupled with advanced direct digital controller. The result is the highest gas/electric packaged system cooling efficiency level available today

This iQ Drive can operate at lower capacity during mild spring or fall days through boost capacity mode during the hottest summer days. Running at reduced capacity, it can provide better comfort. It performs more quietly and at greater efficiency than traditional single-stage units.

- Low Utility Bills
 - » Ultra High Efficiency - 20 SEE
 - » Five stages of control
- Quiet Operation – 59dB
- Architecturally Friendly – small footprint
- Comfort
- More consistent temperature level
- Fewer hot and cold spots

Look for products with the ecoLogic® seal. It's your sign of environmentally friendly, high-efficiency heating and cooling products. Only the most energy efficient, most environmentally responsible units carry our ecoLogic seal of quality.

SmartLite® CONTROL BOARD

The SmartLite® control board learns the igniter's heat-up characteristics. It then adapts the ignition time to the packaged system's characteristics. The result is a longer life for the igniter.
