13 to 14 SEER high efficiency  
SPLIT SYSTEM AIR CONDITIONERS  
AND COILS

## SPLIT SYSTEM AIR CONDITIONERS

Single-Stage, Fixed-Speed and Variable-Speed

**For your life. style. home.™**

From standard efficiency air conditioners, to the most efficient split system available, NuTone heating and cooling systems can clean your air, adjust indoor temperatures by room and control humidity. All while saving you money. Plus, NuTone offers industry-leading product warranties on furnaces, air conditioners, and more. You can trust NuTone to comfort your life, style and home.

- **Long-lasting peace of mind.** Every air conditioner is triple checked at each manufacturing stage, for an average of 144 quality checks as your unit is built. In addition, all electrical and mechanical components are 100% fired and tested on the manufacturing line. When your contractor arrives, you can be sure that only the highest quality air conditioner is being delivered to your home.
- **Designed for easy care.** Smooth and practical lines make your NuTone air conditioner attractive on the outside. All units are finished with a silicone protective polyurethane finish. This step protects your unit from corrosion 50% more than standard outdoor finishes.
- **Built to last.** From a long-lasting motor to the one-piece orifice, your unit will provide years of trouble-free and reliable service.
- **Total comfort.** Great airflow and quiet performance are part of the NuTone comfort equation.

- 1 Scroll compressor for quieter operation—fewer working parts than reciprocating piston compressors, longer service life and reliability
- 2 Heavy duty motor—provides maximum high-speed efficiency for improved air flow capacity long-lasting durability and quiet operation. It is completely protected from rain and snow, and requires no maintenance.
- 3 A Stylish jacket—full-metal, louvered jacket protects coil from impact of flying debris due to mowing, golf balls, hail and other hazards  
B Solid construction—galvanized steel for added strength and durability, featuring silicone-protected 1.5 mil polyurethane finish that provides superior corrosion resistance, 50% better protection than standard outdoor finishes
- 4 One-piece top with integrated fan orifice designed for maximum air flow and minimum noise
- 5 All-aluminum Micro-Channel coils for increased resistance to corrosion.

## Our up to 14 SEER air conditioners.

Cooling performance is measured by a Seasonal Energy Efficiency Ratio (SEER). The higher the SEER rating, the more efficiently your unit operates. Increased efficiency translates into savings in utility costs.

	Standard Efficiency	Permanently Lubricated Motor	Variable-Speed Indoor
Up to 14 SEER Air Conditioner	✓	✓	Optional

## The benefits of a variable-speed system.

A single-stage air conditioner is sized to cool your home on the hottest day of the year. It delivers 100% of its cooling capacity at all times. When you install a NuTone air conditioner with an indoor section featuring a variable-speed motor, you'll experience better comfort and lower utility costs. A NuTone variable-speed system operates at up to 14 SEER.

A NuTone variable-speed system automatically maintains its programmed level of air flow regardless of dynamic changes in static pressure. Static pressure will change with a dirty air filter, zoning changes and obstructed supply registers as an example. Better indoor air quality is achieved quietly and inexpensively by setting the motor to run continuously at reduced airflow levels between cooling cycles. The NuTone variable-speed system also operates quieter than conventional motors, while reducing temperature swings, indoor moisture, and hot spots.

## How much will you save?

Annual costs based on 36,000 Btu unit, 1500 cooling load hours, and .08/kwh. Actual costs may vary depending on climate conditions, energy rates and patterns of usage.

## INDOOR COILS

Cased and Uncased

### NuTone evaporator coils.

Quality, Durable, Energy- Efficiency, Value and Comfort. These are the things you expect from a NuTone product, and they're exactly what you'll get with our indoor coils.

Would you ever buy a new car, and ask to have your old tires be put on it? Probably not. Similarly, when you buy a new air conditioner, should you use your old indoor coil? Definitely not. Here's why: An old, dirty, coil designed for a less efficient product, will prevent your outdoor unit from performing at the optimum efficiency, and may even damage your new air conditioner compressor. Also, a coil designed for a different brand has not been matched or tested with your new system so efficiency ratings and performance can also be affected.

NuTone offers all-aluminum Anteater MC® Micro-Channel coils that reduce formicary corrosion, the number one cause of coil leaks.

# NuTone 10-Year Limited Warranty

## 10-Year All Parts

When a product is truly built to exacting standards of quality and durability, the manufacturer's confidence is reflected in its warranty. NuTone heating and cooling products offer one of the best warranties in the business— 10 years on all parts when product is registered. See warranty details for more information.

## 10-Year NuTone Quality Pledge

If the heat exchanger (the major component of your furnace) or the compressor (the most important part of your air conditioner) fails within the first 10 years when registered, we'll replace the product with like product under the NuTone Quality Pledge program. A matched system is required to qualify for the NuTone Quality Pledge.

## Limited Lifetime Heat Exchanger Warranty

When you register your new NuTone furnace or gas/electric packaged system, we will also extend the heat exchanger warranty from 20 years to the limited lifetime heat exchanger warranty.

## 10-Year on Coils

When you install and register your new NuTone coil with your new NuTone system, we will also extend the warranty to the 10-Year Limited Parts Warranty.

## 10-Year on Indoor Air Quality Products & Zoning Products

When you install and register any of our NuTone Indoor Air Quality or Zoning with your new NuTone system, we will also extend the accessory warranties to the 10-Year Limited Parts Warranty.

## Commercial Applications

Equipment utilized in commercial applications carries a 1-Year parts warranty, 5-Year compressor warranty and a 10-Year heat exchanger warranty.

## Warranty Registration

To assure you take advantage of these longer warranties, register your system within 60 days of installation (or within 60 days of occupancy of a new residentially constructed home with these products) at [www.nutonehvac.com](http://www.nutonehvac.com). See warranty details for more information.

## Extended Warranty Protection

While your NuTone warranty covers parts, it does not cover the cost of labor charged by your contractor for service and repair. However, extended labor protection plans are available to cover labor costs associated with repairs. Your contractor may offer various coverage plans; we recommend you look for the Contractors' Preferred Protection Plan brand approved for NuTone.

\* Warranties not registered default to 5 years.
