

PROVIDING COMFORT, QUALITY AND WORRY-FREE PERFORMANCE

**M1200 15 SEER, R-410A, Two-Stage, Fixed-Speed
Packaged Air Conditioner & Heat Pump Products**

**Maytag® M1200 Extra High-Efficiency
R-410A, Two-Stage, Fixed-Speed Packaged, 2-5 Tons
15 SEER Air Conditioners
15 SEER/8.0 HSPF Heat Pumps**

You can always look to Maytag to make your life just a little more livable. Maytag's Series of packaged heat pumps and air conditioners work seamlessly and efficiently to increase your comfort at home. These units are designed to be quiet and energy efficient while providing comfort and dependability. For your peace of mind, each Maytag unit comes with the Worry-Free Warranty, one of the most comprehensive warranties available.

Unlike most heating and cooling systems, which are divided into outdoor and indoor sections, a "packaged" system includes all the components necessary to heat and/or cool your home in one, convenient unit.

Two-stage cooling operates at lower capacity during mild summer days and at full capacity during hotter ones. Because these units run at

a reduced capacity, they provide better comfort and perform more quietly than single-stage units. The fixed-speed ECM direct-drive motor provides higher torque and operating speeds for improved air flow capacity.

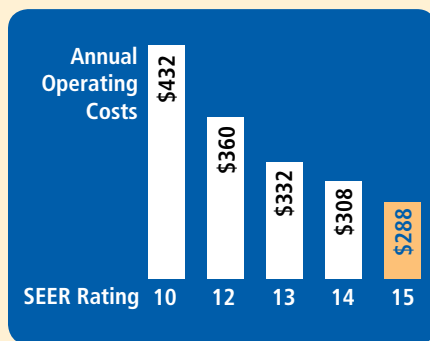

Maytag's 15 SEER/8.0 HSPF packaged heat pumps provide electric heating and cooling. During warmer months, it collects heat from the air in your home and moves it to the outside. In winter, the process reverses, and the heat pump collects heat from air outside to warm the air inside your home.

Supplemental heater kits can also be installed with Maytag 15 SEER packaged air conditioners to heat the home. Your Select Maytag Dealer can recommend the appropriate packaged product for your home.

Energy Efficiency

Maytag packaged products provide high-efficiency, less energy consumption and lower utility bills. You can be sure in the total comfort of your home that Maytag packaged products will save you more.

Annual costs based on 36,000 Btu units, 1,500 cooling load hours and .08/kwh. Actual costs may vary depending on climate conditions, energy rates and patterns of usage.

Environmentally Smart

Maytag Packaged Systems features Smart Cool 410™ refrigerant, an earth-friendly, non-ozone-depleting refrigerant.

Quiet Comfort

The high-efficiency condenser motor and fan blades provide quiet operation and low vibration.

Your packaged unit is only one part of the comfort system that affects your air quality and energy savings. Maytag offers a complete line of system components to improve indoor air quality and help ensure the performance of your comfort system.

Durability and Style

All Maytag packaged air conditioners and heat pumps are built using proven, reliable parts. Each part is examined carefully with our rigorous quality check process.

Environmentally and Economically Smart

Maytag 15 SEER Two-Stage, Fixed-Speed Packaged Air Conditioners

and Heat Pumps meet the ENERGY STAR guidelines for product efficiency. ENERGY STAR certification is awarded to products designed to reduce energy consumption and utility costs.

Peace of Mind

This Series of products offers a 12-Year Worry-Free Limited Warranty on parts.

Plus, our Dependability Promise states that your entire unit will be replaced if the compressor or heat exchanger fails within the first 12 years of purchase.

Ask your Select Maytag heating and cooling dealer or visit us at www.maytaghvac.com for warranty details.
