

PROVIDING COMFORT, QUALITY AND WORRY-FREE PERFORMANCE

M1200 Air Handlers

Maytag® Variable- and Fixed-Speed Air Handlers

You already know what millions of families have known for more than 100 years: Maytag means dependability, reliability and worry-free performance. So leave it to Maytag to offer a world-class air handler to make your Maytag air conditioner or heat pump even more energy efficient, and air quality even better where it counts the most — in your home.

These air handlers can increase your overall comfort by minimizing the amount of stagnant air in your home. When paired with an air conditioner, it circulates cool air in your home during the summer. When it is matched with a heat pump, it works all year long, circulating cool air in the summer and warm air in the winter.

If you replace your air conditioner or heat pump, Maytag highly recommends that you also replace the existing air handler with a matched Maytag air handler. By doing this, you can ensure maximum efficiency and performance of your comfort system.

Variable-Speed Air Handlers for Better Comfort

A variable-speed air handler significantly improves system efficiency, as well as indoor air quality and sound levels. By mixing air from floor to ceiling, the variable-speed technology creates more uniform temperatures. By reducing air velocity, it allows airborne particles and moisture to be captured at a higher rate resulting in improved air filtration and reduced humidity levels.

Innovation and Style

Maytag Air Handlers feature an attractive brushed stainless steel cabinet doors.

Smart Technology

Maytag Air Handlers work with split system products utilizing R-410A.
