TECHNICAL SPECIFICATIONS

MG2R Series

High Efficiency / Direct Vent Condensing Downflow Gas Furnace Induced Draft - 95% AFUE Input 45,000 thru 72,000 Btuh

The high efficiency downflow gas furnace is designed for all manufactured housing applications. It may be installed in a utility room, or enclosed in a closet. CSA design certified for use in the United States and Canada.

Front Return Models

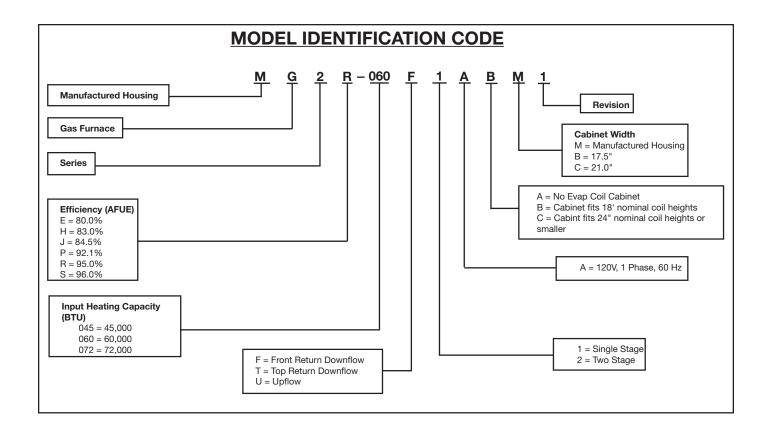

Top Return Models

For California installations in SCAQMD only: This furnace does not meet the SCAQMD Rule 1111 NOx emission limit (14 ng/J), and thus is subject to a mitigation fee of up to \$450. This furnace is not eligible for the Clean Air Furnace Rebate Program: www.CleanAirFurnaceRebate.com.

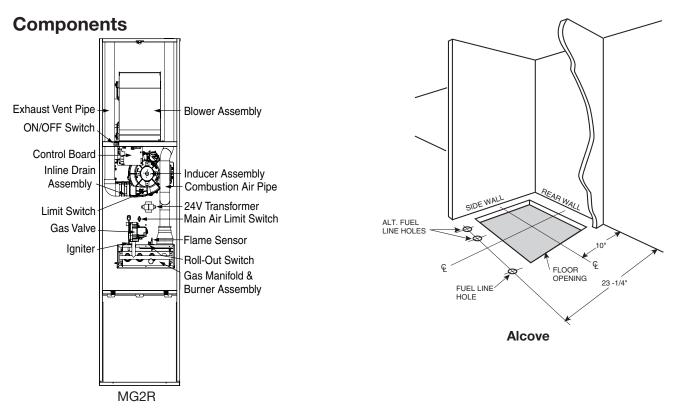

FEATURES and BENEFITS

- **100% fired and tested:** All units and each component (both mechanical and electrical) are tested on the manufacturing line.
- Clean and quiet operation: Due to the unique design of in-shot burners, location of inducer and use of insulation.
- Fixed 30 second blower delay: At burner start-up assures a warm outlet air temperature at furnace start-up. Adjustable blower off settings (60, 90, 120 and 180 seconds).
- Fixed 30-second post purge: Increases life of heat exchanger.
- Dependable, hot surface ignitor: Innovative application of silicon nitride type igniter. Utilizes proven Smartlite[®] technology to extend igniter life.
- **Tubular primary heat exchanger:** Heavy gauge aluminized steel heat exchanger assures a long life.
- Stainless steel secondary heat exchanger: Assures a long life.
- 60 second fixed cooling cycle blower-off delay (TDR): Increases cooling performance when matched with a Nortek Global HVAC coil.
- Sealed combustion approved for direct vent furnace, category IV venting system: May be vertically or horizontally vented using a two-pipe system for maximum flexibility in installation.
- **LP convertible:** Simple burner orifice (included w/unit)and gas valve regulator change for ease of convertibility.
- **3 amp fuse protection against** low voltage shorts: Protects transformer and control board.
- Low voltage terminal board: For easy field wiring.
- **Easy open pawl latch:** Secures the door firmly for transit, yet allows easy removal for access.
- Appliance quality door: Protects against rust and other corrosion. Baked enamel finish allows for easy cleaning.
- Fully insulated cabinet: Insures minimized heat loss and quiet operation.
- **Color coded wire harness:** Designed to fit the components, all with quick-connect fittings for ease of service and replacement.
- **Multi-speed ECM blower:** Designed to give a wide range of cooling capacities. Switches on PCB, provide ultra easy motor speed selection. 40VA transformer included.
- Diagnostic lights for easy troubleshooting without counting flashes: Dedicated light for flame signal strength and 2 lights in combination to indicate all other fault codes with easy to recognize states without counting flashes.

Note: The MG2R will fit in the same footprint and uses the same duct connector as the M1, M3, M7 and MG1E funaces; allowing for direct substitution.

FEATURES High Efficiency Downflow 95% AFUE Gas Furnace

STANDARD EQUIPMENT

Direct vent; draft inducer; pressure switch; redundant main gas control; hot-surface ignition; timed ON/OFF blower controls (TDR); 40VA transformer for air conditioner application; limit controls; direct drive motor; all models can be converted to use LP (propane) gas.

NOTES:

1. Data is shown without filter.

2. Temperature rises in the table are approximate. Actual temperature rises may vary.

3. Individual cells shaded in gray indicate a temperature rise outside of the recommended range.

4. To comply with government mandated efficiency standards, speed settings shaded in gray are not allowed in HEAT mode.
5. The "*" denotes the factory heat setting and "**" denotes the factory cool setting. If the Alternate speed is to be used, the speed tap must be adjusted at the blower motor plug.

VENTING

All models are approved for both vertical and horizontal direct (2 pipe) venting applications. See Vent Table below for specified sizes and allowable lengths.

| Maximum Direct Vent, Dual Pipe Length (ft.)* | | | | | | | | | |
|--|----------------------------------|----------------------------------|--|--|--|--|--|--|--|
| M7RL Inputs (BTUH) | Inlet / Outlet 3 in. Diameter | Inlet / Outlet 2 in. Diameter | | | | | | | |
| 45,000 | 60 | 30 | | | | | | | |
| 60,000 | 60 | 30 | | | | | | | |
| 72,000 | 60 | 30 | | | | | | | |

*NOTES:

- 1. Subtract 3.5 ft. for each additional 3" 90 degree elbow.
- 2. Two 45 degree elbows are equivalent to one 90 degree elbow.
- 3. One short radius elbow is equivalent to two long radius elbows
- 4. Do not include termination elbows in calculation of vent length
- 5. This table is applicable for elevations from sea level to 2,000 ft. For higher elevations decrease vent pipe lengths by 8% per 1000 ft. of altitude.
- 6. Only the listed pipe materials are approved for use with M7 condensing furnaces.
- 7. For Canadian applications, use ULC S636 approved material.

| Pipe Materials | ANSI/ASTM Standard |
|--------------------------|-----------------------|
| Schedule 40PVC | D1785 |
| PVC-DWV | D2665 |
| SDR-21 & SDR-26 | D2241 |
| ABS-DWV | D2661 |
| Schedule 40 ABS | F628 |
| Foam / Cellular Core PVC | F891 |
