HIGH EFFICIENCY M4RC & M4RL GAS FURNACES

Built Exclusively for Manufactured Housing

Exclusively Made For Your Manufactured Home.

Today, the manufactured home is a sophisticated, affordable home that is a smart choice for many buyers. Equally smart is knowing that your manufactured home product is just that — a manufactured home product. Specifically designed for your manufactured home, Intertherm electric furnaces, air handlers, gas furnaces, and oil furnaces offer high efficiency and system dependability.

The more you learn about our manufacturing process, the more you'll see that no other heating and cooling manufacturer compares to Intertherm's product quality — quality made possible through Demand Flow Technology (DFT). While other companies test products at random, we use 100% computer-automated testing on every Intertherm product to eliminate human error. We are the only heating and cooling manufacturer to be DFT certified.

You can rely on your Intertherm comfort expert to make your home more cozy with digital thermostats and other manufactured home accessories. It's a comfort to know that Intertherm is made for your manufactured home, and it's a comfort you can feel.

What is AFUE?

Annual Fuel Utilization Efficiency is the term used to rate the efficiency levels of a Gas or Oil furnace. The higher the AFUE rating, the more energy efficient your system is and the lower your energy costs will be. It measures the amount of heat actually delivered to your house compared to the amount of fuel that you supply to the furnace. Thus, a furnace that has an 95% AFUE rating converts 95% of the fuel that you supply to heat - the other 5% is lost out of the chimney. Compare this to an older furnace that may only deliver 60% efficiency.

If installed in SCAQMD only: The furnaces in this literature do not meet the SCAQMD Rule 1111 14 ng/J NOx emission limit (14 ng/J), and thus are subject to a mitigation fee of up to $450.

These furnaces are not eligible for the Clean Air Furnace Rebate Program: www.CleanAirFurnaceRebate.com.

92.1% AFUE Extra High-Efficiency M4 Gas Furnaces

Proven components to ensure high quality and dependability.

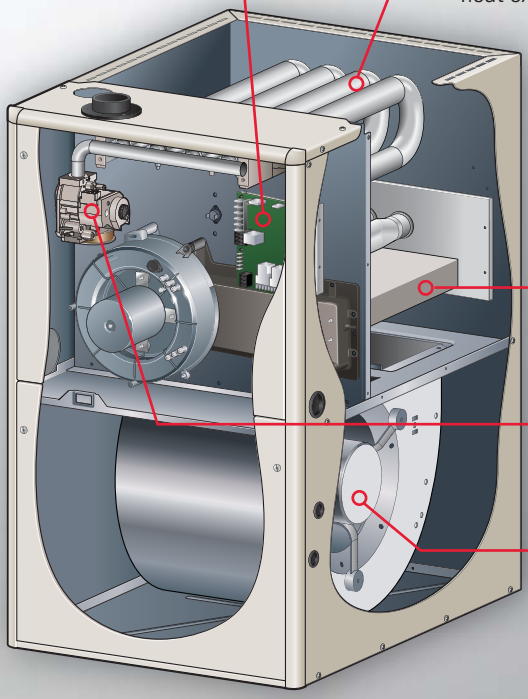

- Our dependable, shock-mounted hot surface ignitor has a 20 year history of reliability. It's controlled by proven SmartLite® technology to increase ignitor life by 25%.
- Heavy-gauge aluminized steel primary heat exchanger and stainless steel secondary heat exchanger ensures long life and efficiency.
- Available in both upflow and downflow models, which can be installed in a utility room or enclosed closet.
- The built in time-delay relay increases cooling performance when matched with an Intertherm cooling system.
- Fully insulated cabinet provides quiet operation.
- All units and each component are tested on the manufacturing line to ensure quality, performance and safety.
