

Manufactured Housing AHRI-Rated Coils

Key Features

- A** Metering Devices For All Applications (Piston & TXV)
- B** Available With Sweat Fit or Quick Connect Fittings
- C** Built-in Strainer For Coil Protection
- D** UL® Listed and Leak Tested at 500 p.s.i.
- E** Dual Opening Drain Pan
- F** Installation Kit Contains Drain Hose, Fittings, and Installation Instructions

Standard Features

- Designed specifically for Mobile Home applications
 - Wide range of AHRI-rated applications
 - Metering devices for all applications (Piston and TXV)
 - Applications for A/C and Heat Pump
 - Available with Sweat Fit or Quick Connect fittings
 - Coil has built-in strainer for coil protection
 -  LISTED listed and leak tested at 500 p.s.i.
 - Dual opening drain pan*
 - Kit contains drain hose, fittings, and Installation Instructions
 - High strength/durable packaging-for secure storage and handling
 - Optional factory installed TXV's
- * Note: Oil furnaces require optional High Temperature Drain Pans

Coil Selection Guide

Selection steps:

1. Identify the needed capacity, A/C or H/P, and Local/Regional Standards requirements (SEER, EER, HSPF) - see example below*
 - A. Example—Nominal 3 Ton
 - B. Example — A/C only
 - C. Example—14 SEER, No EER requirements
2. Identify the outdoor unit to be used-Brand and Model
3. Identify the mobile home furnace to be used or installed
 - A. Determine furnace coil cabinet height available (Mortex™ cabinet extensions available for EB Series downflow models)
 - B. Determine furnace coil cabinet depth available. Mortex™ builds coils with 2 different pan depths for additional capacity. The exclusive new deeper pan requires the addition of cabinet extension in some applications. (Mortex™ cabinet extensions available for many models).
4. Select the correct AHRI-rated coil
(See @ www.ahridirectory.org)

Mortex™ has hundreds of coil options available for all applications.

Mortex™ maintains thousands of AHRI ratings.

Mortex™ has the coil to fit your needs.

96 Series: Fits all furnaces

97 Series: Fits all electric furnaces (requires slight modification on EBxx models)

98 Series: Fits all Mortex® and Nordyne® electric furnaces. EBxx models up to 24" height with optional Mortex® coil cabinet extension.
