iQZone™

ZONING SYSTEM

NUTONE iQ ZONE™ SYSTEM

iQZone

The very best in home comfort.

Perfection is possible with a NuTone iQ Drive® heating and cooling system paired with an iQ Zone™ zoning system. iQ Drive delivers constant comfort with extreme energy efficiency – up to 24.5 SEER for air conditioners, 22 SEER for heat pumps and 97+% AFUE for furnaces.

iQ Zone takes that comfort to the next level by allowing you have to have different temperature controls for different areas of your home. Ask your NuTone contractor about iQ Drive with iQ Zone, the very best comfort for your home.

We're all about total comfort in every room of your home.

Today's homes are larger and have more heating and cooling challenges than ever before. Zoning was developed to provide homeowners with total comfort on every floor and in every room of their home. From the upstairs bedrooms to the finished lower level to the cathedral ceiling great room, zoning provides comfort.

With zoning, living spaces are essentially divided into separate comfort zones. The different comfort

zones can either be designated room-by-room, or by a group of rooms, and are controlled by their own thermostat.

NuTone gives you the option to customize up to eight different comfort zones. Air flow to each zone can be sent where it is needed depending on changing climate conditions, or activities during the course of a day.

HOW iQ ZONE™ WORKS

iQ Zone lets you customize your comfort by dividing your home into several independent comfort zones, all powered by your iQ Drive® system. Each zone in your home will have its own thermostat. A master controller gets continuous feedback from the zone thermostats and the iQ Drive units. It automatically opens and closes motorized dampers in your ductwork to control the amount of warm or cool air going to each zone, thereby creating the ideal temperature. All you do is set the individual thermostats. iQ Zone handles the rest.

Whisper quiet operation.

Your iQ Drive system is already one of the quietest on the market. So it's good to know that your zoning system will be just as quiet. The only way you'll know iQ Zone is operating is because every room will have the total comfort you prescribe.

A NuTone iQ Drive system is one of the most energy efficient, quietest systems you can buy.

How much will you save?

Annual costs based on 36,000 Btu unit, 1500 cooling load hours, and .08/kwh. Actual costs may vary depending on climate conditions, energy rates and patterns of usage.

Extreme energy savings.

Of course, when you're fine-tuning your room temperatures, you're also fine-tuning your energy savings. At up to 24.5 SEER, the iQ Drive air conditioner and heat pump are the nation's most efficient comfort systems. By adding iQ Zone, you can save up to an estimated 12 percent more on your energy bills. The biggest difference is in winter, so the colder your climate, the more you'll save.

NuTone 10-Year Limited Warranty

10-Year All Parts

When a product is truly built to exacting standards of quality and durability, the manufacturer's confidence is reflected in its warranty. NuTone heating and cooling products offer one of the best warranties in the business— 10 years on all parts when product is registered. See warranty details for more information.

10-Year NuTone Quality Pledge

If the heat exchanger (the major component of your furnace) or the compressor (the most important part of your air conditioner and heat pump) fails within the first 10 years (when registered), or five years (not registered) we'll replace the product with like product under the NuTone Quality Pledge program.

Limited Lifetime Heat Exchanger Warranty

When you register your new NuTone furnace or gas/electric packaged system, we will also extend the heat exchanger warranty from 20 years to the limited lifetime heat exchanger warranty.

10-Year on Air Handlers & Coils

When you install and register your new NuTone air handler or coil with your new NuTone system, we will also extend the warranty to the 10 Year Limited Parts Warranty.

10-Year on Indoor Air Quality Products & Zoning Products

When you install and register any of our NuTone Indoor Air Quality or Zoning with your new NuTone system, we will also extend the accessory warranties to the 10 Year Limited Parts Warranty.

Warranty Registration

To assure you take advantage of these longer warranties, register your system within 60 days of installation (or within 60 days of occupancy of a new residentially constructed home with these products) at www.nutonehvac.com. See warranty details for more information.

Extended Warranty Protection

While your NuTone warranty covers parts, it does not cover the cost of labor charged by your contractor for service and repair. However, extended labor protection plans are available to cover labor costs associated with repairs. Your contractor may offer various coverage plans; we recommend you look for the Contractors' Preferred Protection Plan brand approved for NuTone.

* Warranties not registered default to 5 years.
