The Maytag Whole-House HEPA Air Cleaners provide certified true HEPA filtration for the whole home. These tightly-sealed, 2 or 3-stage filtration systems remove 99.97% of airborne contaminants 0.3 micron and larger and becomes more efficient as the filter becomes dirtier with time. Removes dust, pollen, mold, fungi, bacteria, viruses, animal dander, cooking smoke and grease, tobacco smoke particles and more. They are unmatched by competitors products for superior construction, efficiency, ease of use, and installation versatility.

Standard Features

- 2 or 3-Stage Filtration System.
- Long-life, certified True Hepa filter is 99.97% efficient on particles 0.3 micron and larger on the first pass of air through the filter and it becomes more efficient with continuous use.
- Carbon Prefilter removes lint and unpleasant odors to extend the life of the HEPA filter.
- Carbon Volatile Organic Compound (VOC) After Filter removes additional odors (included with Model M-HEPA550-3).
- Contains separate fan motor, which delivers 245 to 560 CFM of filtered air, depending on the model.
- Plug-in Power Cord, for easy electrical connection.
- Heavy gauge, powder coated steel cabinet and stainless steel door resist corrosion and provide rigid installation and durability.
- Installation can be freestanding, ceiling, wall or floor mounted.

How It Works

Millions of airborne particulates and gases travel through the heating/cooling system 4-5 times every hour. The HEPA Air Cleaner connects to the return air duct and diverts 1/3 to 1/2 of this dirty air through a tightly sealed 3-stage filtration system. A home can reach as many as 67 whole-house air changes/day depending on the house size and model chosen. And when a Maytag High Efficiency Electronic or Media Air Cleaner is added to the return air, the home can achieve 96 - 120 whole-house air changes/day (with system fan on continuous).
