TOUGH.
SMART.
TAPPAN.™

TAPPAN
TAPPAN

Built Tank-Tough In America With Pride.

The Tappan name has always stood for appliances that are tough. And smart. Tappan's introduction of the microwave in 1955 revolutionized cooking. Then, just five years later, pilot lights in furnaces and stoves became a thing of the past with Tappan's invention of electronic ignition.

Today, our line of heating and cooling equipment is still just as solidly-built as our tank-tough stoves built for the military in World

War I and II. In fact, our oil furnaces offer a limited lifetime warranty on the heat exchanger, and all parts for up to 10-years. Without

question, the best in the business. Even more, they're Tappan smart. Packed with precision-engineered components that deliver extended service life, plus state-of-the-art efficiency and comfort.

Quality. Durability. Value. It's what millions of consumers and contractors have come to expect from Tappan. So no matter how much our product line expands,

and technology may change in the future, our reputation will always remain the same: Tough. Smart. Tappan.™

The Tappan Tough™ Quality Pledge.

Because Tappan furnaces are built-tough for the long run, the most critical component — the heat exchanger — is backed by the Tappan Tough™ Quality Pledge. Simply put, it assures trouble-free performance for up to 10 years. Anything less, and we'll replace the entire furnace.

For even greater peace of mind, internal working parts of every Tappan furnace are covered by a limited warranty for replacement up to 10 full years.

Ask your Tappan dealer or go to www.tappan.net for warranty details.

Single-Stage Oil Furnace with Fixed-Speed Blower

- Durable, 100% welded steel heat exchanger
- Multi-speed direct-drive motor provides higher torque and operating speeds for improved air flow capacity. It's permanently lubricated, resilient mounted for quiet operation.
- Smoother motor operation reduces noise and lowers winding temperatures that help to extend bearing-life of the motor
- Efficiently reduces electricity consumption for blower operation compared to standard motors
- Pre-wired fan center relay for air conditioning, standard on all direct-drive models
- 20/22-gauge steel cabinet for added strength and durability
- Fully insulated cabinet and blower compartment for quieter operation
- "Wrap Around" radiator type for maximum heat transfer
- Barometric Draft Control—included with all models
- Finish—thermosetting powder coat for greater durability
- Exceptional Warranty—10-Year Limited Parts Warranty/ 10-year Tappan Tough Quality Pledge. Ask your Tappan dealer or go to www.tappan.net for warranty details.

Putting It All Together With Quality Service.

To learn how you can get the most comfort—and biggest return in energy savings from a totally integrated indoor comfort system, talk to your Tappan dealer. From thermostats, to air cleaners, matched coils for new condensing units, humidity and zone control systems, and other indoor air quality accessories, you're sure to get tough, dependable technology that's built to last. All of which makes you one very smart customer. Tough. Smart. Tappan.™

Energy Definitions

AFUE—Annual Fuel Utilization Efficiency

It measures the amount of heat actually delivered to your house compared to the amount of fuel that you must supply to the furnace. Thus, a furnace that has an 80% AFUE rating converts 80% of the fuel that you supply to heat—the other 20% is lost out of the chimney.

As ratings increase, so does unit efficiency.
