

Westinghouse

92.1 AFUE

*Single-Stage, Fixed Speed
Gas Furnaces*

Engineered for Quality

- More than just better indoor comfort; we want you to feel comfortable investing in a product that will perform when you need it most. Each Westinghouse furnace is checked approximately 234 times during the manufacturing process then run-tested to check operation performance. In the final analysis, computer-automated testing is performed to capture operation data for future reference
- should your dealer ever need it.
- Westinghouse furnaces are built with proven components to provide safe, clean and reliable comfort year-round. For example, our stainless steel secondary heat exchanger has a limited lifetime warranty.
- This furnace meets the Energy Star guidelines for efficiency performance. The bottom line to you is savings in your utility costs.

Using Energy Star products maximizes your monthly energy savings, comfort and indoor air quality and helps reduce the nation's energy consumption and pollution. Properly sized and installed, a new Energy Star furnace is 25-40% more efficient than older models and can save you money on heating bills. Your Westinghouse dealer can give you more information based on your local energy rates.

When a furnace is truly built to exacting standards of quality and durability, the manufacturer's confidence shows in its warranty.

At Westinghouse we offer a 10-year warranty on all parts and a 10-year quality pledge at no extra cost.

With our 10-year quality pledge, we will replace the entire unit should the heat exchanger fail in the first 10 years.

To learn more about our product warranties, ask your Westinghouse dealer, or visit us on the web at www.westinghousehvac.com for details.

When choosing a furnace, look not only at the product, but also the service and support provided by your dealer. Your Westinghouse dealer can help you select the right furnace for your home and keep it in top operating condition.

So for home comfort year after year, trust the Westinghouse brand.

92.1 AFUE

Single-Stage, Fixed Speed Gas Furnaces

Features & Benefits

Durable, stainless steel secondary heat exchanger provides extra high efficiency performance and is backed by a limited lifetime warranty.

Westinghouse furnaces feature a SmartLite® Control Board to increase the life of the igniter beyond the standard 20-year life expectancy. SmartLite learns and adapts its ignition process to the furnace as installed in your environment.

Westinghouse furnaces come ready to add other Westinghouse accessories like programmable thermostats, whole-home humidifiers, air cleaners, HEPA systems and more. If allergens, dust, mold, pet odor, dry air, temperature control etc. is a problem for you or your family members, ask your dealer how he can design a Westinghouse system to reduce common irritants, and increase comfort throughout the home for everyone.

Cabinet is fully insulated to shield operation sound making this furnace one of the quietest available today. Its Silicone-protective polyurethane coating resists scratching and prevents rusting to keep your furnace looking new for years to come.

*** Dollar amounts computed at \$.092 ccf, for 2500 full-load heating hours and a system rated at 60,000 Btuh. Actual costs may vary depending on climate conditions, fuel rates, and patterns of usage according to individual lifestyle.**

What do you look for when choosing a furnace? Most likely, you're looking for quality, dependability, energy-efficiency, value and comfort - all from a brand with an excellent reputation. After all - You can be sure... if it's Westinghouse. We've built our reputation on providing the highest quality products possible. You'll enjoy all of these benefits, along with excellent service, from your experienced Westinghouse dealer.

First, let's talk about efficiency. It's usually one of the first questions customers ask. Essentially, gas furnace efficiency is measured in AFUE ratings. That stands for Annual Fuel Utilization Efficiency. And, the AFUE rating equals the percent efficiency the unit delivers. The higher the percentage the more efficient the unit.

Our 92.1 AFUE gas furnace delivers a minimum of 90% efficient heat. Compare that to older furnaces that may deliver only 50-60% efficiency. The savings on your monthly energy bills can really add up over the life of your furnace.
