

## M120 SERIES

# 80 AFUE High-Efficiency Gas Furnaces Two-Stage

iSEER®

## Depend on Maytag®

Maytag, the name that stands for reliability and dependability, offers you the perfect choice for consistent home comfort. Let cool winds blow outside, because your Maytag furnace will provide a consistent temperature inside while improving air flow and air quality for your family. When you add a Maytag M120 Series 80% AFUE gas furnace to your home, you invest in comfort and worry-free performance for years to come. And your smart decision is backed by an impressive 12-year limited parts warranty!

## CONSISTENT HOME COMFORT

Below are key features and benefits of Maytag's M120 Series 80 AFUE\* two-stage, fixed-speed gas furnaces.

- 80% AFUE promises a practical and energy efficient heating system.
- Two-stage furnace technology automatically adjusts energy usage based on the outside temperature, which increases comfort and reduces energy consumption.
- Each unit offers Maytag's exclusive 12-year Worry-Free Limited Warranty on parts, and a limited lifetime heat exchanger warranty.
- Our Dependability Promise states that your entire unit will be replaced in the first year should the heat exchanger fail. See your warranty for details.
- SmartStart® state-of-the-art control board learns the start-up characteristics of the furnace as installed in your home. It adapts to the most efficient start-up time, extending the life of the igniter.
- At less than 35 inches tall, the unit's short profile makes it ideal for tight spaces, such as utility rooms or closets.
- iSEER® technology increases the energy efficiency of your outdoor air conditioner or heat pump cooling efficiency.

\* AFUE: Annual Fuel Utilization Efficiency

## DEPEND ON MAYTAG®

Just as you expect from Maytag, your M120 Series high-efficiency gas furnace offers one of the best warranties available in the industry. The 12-year Worry-Free Limited Warranty on parts reflects Maytag's commitment to you. Ask your select Maytag heating and cooling dealer for details, or visit us at [www.maytaghvac.com](http://www.maytaghvac.com).

## SAVING MONEY AND CONSERVING ENERGY

Your Maytag gas furnace has been evaluated with the Annual Fuel Utilization Efficiency (AFUE) scale. The higher the number, the more efficiently your furnace operates. The 80 AFUE rating means that the furnace functions at 80% efficiency, which can save you more money on your utility bills than older, less efficient furnaces.

## CREATE TOTAL INDOOR COMFORT

Indoor Coil

Thermostat

Air Cleaner

Humidifier

Your gas furnace is only one part of the comfort system that affects your air quality and energy savings. The following system components from Maytag can improve indoor air quality and help ensure the performance of your comfort system.

**Indoor Coil:** When you install a new split system air conditioner, Maytag recommends you replace the existing indoor coil with a matched Maytag coil to guarantee maximum efficiency and performance of your outdoor unit. (Please note the Dependability Promise is valid only when you install both the outdoor air conditioner and indoor coil.)

**Programmable Thermostat:** The thermostat automatically adjusts your indoor temperature to accommodate both your home and away schedules, thereby reducing energy costs.

**Humidifier:** Climates with dry air can irritate your skin and trigger allergies, as well as cause furniture and dry wall to crack. A whole-house humidifier helps maintain appropriate moisture levels within your home.

**UV Germicidal Lamps:** Installing an ultraviolet accessory on your furnace or air handler helps eliminate odor-causing mold and fungus that can develop in the wet area of an evaporator coil or drain pan.

**Electronic Air Cleaner:** Improve indoor air filtration with an electronic air cleaner that can remove 95% of household allergens, such as dust mites, pollen and smoke.

For more information about these and other Maytag products, please consult your select Maytag heating and cooling dealer.

Your furnace's two-stage technology also can save you money. The two-stage feature adjusts energy consumption based on the outside temperature so your furnace will not use more energy than necessary.
