# **B6VMAX Series**

## Air Handler with TXV 13-19 SEER Residential System 18,000 - 60,000 Btuh (Heat Pump & Air Conditioner) R-410A Refrigerant

The B6VMAX Series of air handlers, when combined with our heat pump or air conditioner, offers a full line of quality, split system heating and cooling equipment.

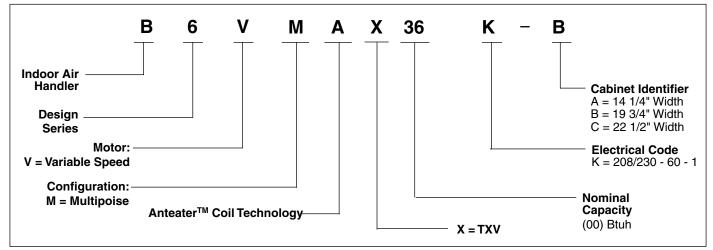

## WARRANTY

 This product carries a 5-year all parts warranty. When installed with a matched outdoor unit, the air handler will carry the outdoor system warranty. See current warranty document or visit our consumer web site for warranty details.

# FEATURES and BENEFITS

- Energy Efficient Variable Speed ECM Motor: Advanced technology provides 16 field-selectable cooling airflows and automatically sets heating airflows based on the amount of installed heat.
- Quiet Blower Operation: Extra quiet and smooth blower on and off cycles.
- **Constant airflow:** Motor automatically adjusts to different static loads.
- **Reduced air stratification:** This results in improved air quality by optimizing humidity removal and filtration capabilities.
- **Multi-poised:** Can be used in horizontal, upflow, downflow and vertical applications.
- Built in Filter Rack: makes the air handler easy to service.
- **Plug-in Heater Kit:** Available in 5 kw through 30 kw (Not for use in 115 Volt units)
- **Circuit Board:** Incorporating blower time delay relay, low voltage terminal strip, and heat-strip sequencing.
- **Breaker Accessibility:** Breaker accessible from the front of the unit when heater is applied.
- Plastic Drain Pan: Provides corrosion resistance.
- **Durable Cabinet:** Galvanized steel with a polyurethane finish. The finish will endure 950 hours of salt spray and resist corrosion 50% better than comparable units.
- **Designed to meet the requirements 610.2.A.2:** Meets Florida building code requirements for air leakage.
- **Thermal Expansion Valve:** Factory installed externally equalized thermal expansion valve provides precise refrigerant control under varying load conditions.
- **Cabinet Insulation:** 1" insulation with an R-value of 4.2 contributes to quiet operation and prevents cabinet sweating in difficult applications.
- Anteater<sup>™</sup> Coil Technology: Copper alloy with zinc additives to stop formicary corrosion.

#### NOTES:

NOTES:
Airflow values listed are for 240V operation. For 208V operation, multiply A & B cabinet values by .95; for C-cabinet values multiply by .90
When matched with two-stage outdoor units the airflow on low (Y1 or W1) input only will be 70% of the values shown in this table.
