

Westinghouse

13 SEER

*High-efficiency Packaged
Air Conditioners
and Heat Pumps*

Engineered for Quality

- More than just better indoor comfort; we want you to feel comfortable investing in a product that will perform when you need it most. Each Westinghouse air conditioner and heat pump is checked approximately 78 times during the manufacturing process then run-tested to check operation performance. In the final analysis, computer-automated testing is performed to capture operation data for future reference should your dealer ever need it.
- Westinghouse packaged heat pumps and air conditioners are built with proven components to provide safe, clean and reliable comfort year-round.

Why choose a package unit? Well, a package unit offers the convenient electric cooling of an air conditioner or the energy efficiency of a heat pump. All in one space-saving unit. Ask your Westinghouse dealer to analyze your comfort needs and recommend the best package heating or cooling solution for your home.

When a package unit is truly built to exacting standards of quality and durability, the manufacturer's confidence shows in its warranty.

Westinghouse products offer a

10-year warranty on all parts and a 10-year quality pledge at no extra cost. With our

10-year quality pledge,

we will replace the entire unit should the compressor

fail in the first 10 years. To learn more about our product

warranties, ask your Westinghouse dealer, or visit us on the web at www.westinghousevac.com for details.

When choosing a package unit, look not only at the product, but also the service and support provided by your dealer. Your Westinghouse dealer can help you select the right package unit for your home and keep it in top operating condition.

So for home comfort year after year, trust the Westinghouse brand.

High-efficiency Packaged Air Conditioners and Heat Pumps

Features & Benefits

Fan blade design combined with custom condenser fan orifice delivers quiet operation. Its rust-proof plastic-coated coil guard and hail mesh protect coil against flying debris.

The cabinet is finished with a Silicone-protective polyurethane coating that under goes a 950 hour salt spray test for harsher climates. It protects your unit from corrosion 50% more than standard outdoor finishes.

These units are designed with the most reliable compressors. As a matter of fact, when it comes to compressor reliability, our air conditioners and heat pumps continue to be recognized for outlasting other manufacturers who use the same compressor. In fact, the compressor manufacturer reported we performed 35% better than the industry standard.

Reduce energy costs with a Programmable Thermostat. By programming the thermostat to your schedule you can reduce the operating costs.

*** Annual costs based on 36,000 Btu unit, 1500 cooling load hours, and .08/kwh. Actual costs may vary depending on climate conditions, energy rates and patterns of usage.**

*H*eat Pump vs. Air Conditioner

Choosing a heat pump as a comfort solution is typically driven by the climate you live in, and is relative to your comfort needs. The heat pump is designed to provide heat in the winter and is best in environments that do not drop below freezing. Your Westinghouse dealer can recommend the right choice for you, a choice that could save you money during the winter months.

While most heating and cooling systems are made of an indoor and outdoor section, a "packaged" system contains all the heating and cooling components required to heat and/or cool your home in one outdoor unit. Optional electric heat strips easily install to provide supplemental heat. Your Westinghouse dealer can help you determine the best product for your comfort needs.

This product uses environmentally-friendly refrigerant. R-410A refrigerant is non-ozone depleting.
